PALEOANTHROPOLOGICAL FIELDSCHOOL AT OLDUVAI GORGE, TANZANIA
Summer 2016

Program description
This program will provide young scholars with an exceptional study abroad experience at one of the world’s premier paleoanthropological sites: Olduvai Gorge, Tanzania. The site was made famous by the excavations of Mary and Louis Leakey and is home to dozens of the most well-preserved early archaeological sites in the world. Students will have the unique opportunity to support and participate in an international project that is tracking the bio-behavioral evolution of our remote ancestors between 2 and 1 million years ago. While students receive training in basic paleoanthropological field and laboratory techniques they will also experience the rich cultures and diverse wildlife of one of Africa’s most beautiful countries. Each student will gain experience in all aspects of field and lab research. Students will also attend weekly lectures describing the region’s prehistory, culture, and ecology. Four excursions are also planned: two paleoanthropological sites (Engaresero and Lake Ndutu), a visit to the local Masaai market, and a safari day within the Ngorongoro Crater, which supports one of the densest populations of wildlife in Africa.

Program logistics
Students will arrive at Kilimanjaro International Airport, just outside of Arusha, and will be met at the airport by program staff and transported into Arusha for the first night. Students will then be transported to Olduvai Gorge, a trip of approximately 5-6 hours. Once at the gorge, students will stay on-site in tents at the Aguirre-Mturi Field Research Station, which has fresh water for cleaning and consumption, solar lights, and generators. The research station also has its own cooking and dining facility, and food is prepared over an open fire. Students will work six days per week, from 8am to 4pm, with the first half of the day dedicated to field work/excavation and the second half to find curation and analysis. The program runs from mid-June through mid-July. Exact dates TBA.

Eligibility
University of North Carolina at Greensboro (UNCG) and non-UNCG students with an overall GPA of 3.0 and at least one course in anthropology or archaeology are welcome to apply.

Program costs & registration
Students earn 6 credits through UNCG. Fees are expected to be $4,900 (does not include airfare; fees will vary slightly based on enrollment). Fees will cover all research permits, meals, lodging, in-country transport, and excursion fees.

Application deadline December 15, 2015 (a letter of recommendation is required for non-UNCG students)
Deposit deadline January 15, 2016 ($1000)
Questions Contact Dr. Charles Egeland (cpegelan@uncg.edu)
